and to hear our Guest Speaker:

Ken Cowman

Presenting

Overview of Lean Enterprise Management

*****Registration deadline*** Friday, March 1, 2019**

Presentation Summary:

Overview of Lean Enterprise Management

Over the last 35 years, the body of knowledge regarding Lean Operations, Lean Manufacturing and Lean Supply Chain Management has evolved and allowed organizations to reduce the direct costs and time of converting demand into supply. However, the world demands more than just an effective supply chain and the delivery of a quality product or service.

It's now time to take Lean to the next level...the enterprise. This presentation will discuss how organizations have been taking the lessons and methods that we've learned and used in operations management into the rest of the organization, the results of these initiatives and how they are being assisted with the evolution of some technologies over the past decade.

Speaker Biography: Ken Cowman

Ken Cowman's career has spanned over 45 years with 11 of those in operations management followed by more than 35 years as an enterprise solutions and continuous improvement project manager, educator, seminar leader and management coach. He has had over 70 articles published in various magazines.

A founding executive of the APICS Peel Chapter, Ken was part of the team that wrote the Fundamentals of Operations Management courses for APICS. He is also the past Chair of the Business Operations Management Program Advisory Committee at the School of Business at Centennial College.
